

It's "All Hands On Deck" At Your Next Event

ExpoTools introduces a helping hand with new event tools designed to give you vital real-time data for managing your next event as we return to normal.

RFID ROOM OCCUPANCY CONTROL

ExpoTools is proud to announce our latest solution for your next event - **RFID Room Occupancy Control & Reports for Contact Tracing**

Monitor room levels, density, and space availability from behind the scenes through our online dashboard. Your room monitors and hosts can access their specific room information via desktop, tablet, or smartphone in real-time.

Based upon ExpoTools' proven passive RFID portals and using economical RFID tags, badges can be printed on-site or advance-mailed to attendees to further limit contact. Stand-alone portals are strategically placed at room entrances to monitor occupancy levels, session attendance and provide immediate or post-event contact tracing, if needed.

This solution also comes with our gold-standard check-in, attendance and CPE credit reports. Call or email us today to learn more about the **ExpoTools Room Occupancy Control Solutions**.

RFID Passive Tracking (DG360)

- ◆ Fully passive solution, based on low-cost RFID tags
- ◆ Full branding & sponsorship opportunities on units
- ◆ No rigging, trusses, or gantries to install
- ◆ Flexible setup - easily repositioned to go where needed
- ◆ Wireless operation - no hardline or ethernet required
- ◆ No cabling across doorways or floor mats

RFID Online Portal & ExpoLight Conference Application

- ◆ At-A-Glance real-time event information
- ◆ Interfaces with ExpoLight Conference application
- ◆ Complete CPE credit tracking along with safety functions
- ◆ Attendees can see their credits in real-time
- ◆ Third party integration via APIs
